### EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

A period has been added to the end of claims 12 and 14 after structures I and II respectively.

The following is an examiner's statement of reasons for allowance: the prior art does not teach or fairly suggest a method of stimulating a defense reaction in a plant by administering a composition comprising a sulphated fuco-oligosaccharide having a DP of 4-100  $\alpha$ -L fucose units in a concentration of at least 10 mg/l. The closest prior art is seen to be Adachi et al. (US 5,588,254 – of record) wherein Adachi et al. teach methods of promoting growth in plants by applying to seeds mixtures of decomposed focoidin polysaccharides (which are sulphated fuco-oligosaccharides) wherein their composition administered comprises 43% of polysaccharides having a DP from 2-10 and thus 57% which have a DP outside of that range. Thus, Adachi et al. teaches administering mixtures of fuco-oligosaccharides having various DP's to seeds to promote growth and the art does not teach or fairly suggest a method of using a composition comprising a (one) sulphated fuco-oligosaccharide having a DP of 4-100 in a concentration of at least 10 mg/l on plants to stimulate a defense reaction.

Art Unit: 1623

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
